

Dale S. Bedania

FULL-STACK WEB & MOBILE DEVELOPER

(0921) 082 8947 dale.bedania10@gmail.com Angeles City, Pampanga, Philippines

// COVER LETTER

Dear Hiring Manager,

I am writing to introduce myself and to express my interest in joining your team. I am a full-stack web and mobile developer who has spent the last several years shipping production systems end-to-end — scoping, UI/UX, backend, database, and deployment — for clients across real estate, health, education, and sports technology, as well as for a university institutional office. I started programming at thirteen, and more than a decade later the appeal is unchanged: turning a real problem into something people can actually use.

“On nearly every project I have worked on, I was the only developer.

The Head of my university's Institutional Database Management Office selected me personally to design and build a custom employee portal, which I delivered alone — system analysis through production deployment — replacing manual, document-heavy HR tracking with a single searchable source of truth. I did the same for a real estate firm whose operations ran on spreadsheets, and for an Australia-based client for whom I was both the sole developer and the primary point of contact. I am comfortable being handed an ambiguous problem and a deadline, and returning with something deployed.

I build across the whole stack and adapt to whatever a team already runs on. That has meant **Laravel** and **PHP**, **Node.js** and **Express** on the backend; **React**, **Angular**, and **Tailwind CSS** on the frontend; **React Native** and **Flutter** for mobile; **MySQL**, **Supabase**, and **Firebase** for data; and deployments to **AWS**, **Google Cloud**, and **Vercel**. What carries between them is the part that does not change with the framework: a data model that will still hold up in a year, interfaces non-technical staff can use without training, and deployments that do not depend on me being available. Working solo has made picking up an unfamiliar tool routine rather than an obstacle, so I am comfortable joining a codebase built on something I have not shipped with yet.

BS Information Technology — Web Development, HAU '25

Most Outstanding Graduating Student

Most Outstanding On-the-Job Trainee

Dean's & President's List

President, Code Geeks' Organization

My portfolio has live links and case studies for the work above, and my resume is attached. I would welcome the chance to talk about what your team is building. Thank you for your time and consideration.

Sincerely,

Dale S. Bedania
