SUMMARY

Full-stack web and mobile developer who has shipped production systems end-to-end — system analysis, UI/UX, backend, database, and deployment — for clients across real estate, health, education, and sports tech, plus a university institutional office. Works as the sole developer and direct client contact on every engagement, from first scope to live release. BSIT (Web Development) graduate named **Most Outstanding Graduating Student** and **Most Outstanding On-the-Job Trainee** in the program.

EDUCATION

Holy Angel University

Angeles City, Pampanga

Bachelor of Science in Information Technology, Major in Web Development

April 2025

- Awarded **Most Outstanding Graduating Student** and **Most Outstanding On-the-Job Trainee** for BSIT Web Development.
- Dean's List (2022–2024) and President's List honoree; recipient of the HAFRD Academic Scholarship.
- President, Code Geeks' Organization (A.Y. 2023–2024), leading the program's student developer community.

EXPERIENCE

Freelance Full Stack Web & Mobile Developer

Remote

Self-Employed — Direct Client Engagements

2025 – Present

- Deliver production web and mobile builds for direct clients across real estate, health, education, and sports technology — including **Pina Realty Management**, **The Zepatide**, **SPUR**, and **Umbra** (detailed below).
- Run every engagement solo — scoping, UI/UX, backend, database, and production deployment — while serving as the client's single point of contact from first call to live release.
- Translate business requirements directly into shipped features, and hand over systems the client's own team can operate without ongoing developer support.

Direct Client (Australia-based)

Remote

Full Stack Web Developer

July 2025 – August 2025

- Served as the sole full-stack developer, owning every assigned project from planning and design through development and deployment.
- Acted as the client's primary point of contact, translating business requirements directly into shipped features without a middle layer.
- Delivered tailored solutions across time zones, keeping scope, communication, and release timelines self-managed.

Holy Angel University — Institutional Database Management Office

Angeles City, Pampanga

Full Stack Web Developer, Internship

June 2024 – November 2024

- Selected personally by the Head of the IDMO to design and build a custom Employee Portal independently, with minimal supervision.
- Delivered the full-featured Laravel portal solo — system analysis, UI/UX design, backend logic, MySQL schema, and role-based access for HR staff and employees.
- Replaced manual, document-heavy HR tracking with a single searchable source of truth for institutional employee data.
- Managed end-to-end deployment and release, including production hosting and SSL configuration.

NILEliteGears & Complete Vitality Life

Remote

Graphic Designer, Freelance

April 2024 – July 2024

- Designed product previews, custom graphics, banners, and promotional images for marketing and e-commerce channels.
- Optimized visual assets per platform to maximize audience engagement across social media.

SELECTED PROJECTS

HAU IDMO Employee Portal | *Laravel, Tailwind CSS, MySQL, Hostinger*

Institutional employee portal with role-based access that streamlines HR processes and turns document-heavy record keeping into data searchable in seconds.

Pina Management CRM | *React, Supabase, Vercel*

Custom CRM for a real estate firm — property listings, client records, and transactions in one operational portal, replacing a back office that ran on spreadsheets.

Kayantabe | *Laravel, Tailwind CSS, MySQL, Hostinger*

Volunteerism platform that gives organizers and volunteers one home instead of scattered social posts, with mobile-first sign-up built to remove every barrier between wanting to help and showing up.

Umbra | *Laravel, React.js, Tailwind CSS, MySQL*

Tutoring marketplace connecting students and parents with nearby tutors — find, book, and manage sessions end-to-end, built to make learning more accessible and personal.

SPUR Landing Page | *React, Supabase, Vercel*

Conversion-focused landing page for the SPUR mobile app, aligned to the brand and built to turn interest into downloads.

SPUR Mobile App | *React Native, JavaScript, Firebase*

Find your next game, running partner, or tennis match — a location-based app that matches players by skill, surfaces local events, and builds their squad with real-time updates.

The Zepatide | *Figma, React, Supabase, Vercel*

Brand site for medical-grade products, built on a clean, trustworthy design system that communicates product quality and earns buyer credibility.

IMMFI | *WordPress, Elementor*

Rebuilt a modern, user-friendly layout on updated design principles — sharpening the experience while holding the organization's brand identity across every page.
